

# Imogene King

## King's Conceptual System & Theory of Goal Attainment

Brandon Rachal

## Imogene King

- *First to develop nursing framework **and** a nursing theory related to the nursing framework*

## Ancestry of Imogene King

Born in West Point, Iowa

January 30, 1923

## Ancestry of Imogene King

Received diploma in nursing from St. John's  
Hospital School of Nursing, St. Louis, MO

1945

# Ancestry of Imogene King

Received BSN in Nursing Education from Saint Louis University, Saint Louis, MO

1948

# Ancestry of Imogene King

Received MSN from Saint Louis University, Saint Louis, MO

1957

## Ancestry of Imogene King

Received Doctorate of Education from Teacher's College, Columbia University, NYC

1961

## Ancestry of Imogene King

While working as associate professor of nursing at Loyola University in Chicago (1961-1966), she developed a master's degree program **and** published her **first** theory article in **Nursing Science** with Dr. Martha Rogers as editor

1964

## Ancestry of Imogene King

Served as Assistant Chief of Research Grants Branch, Division of Nursing in the US Department of Health, Education, and Welfare.

Published "**A Conceptual Frame of Reference for Nursing**" in *Nursing Research*

1966-68

## Ancestry of Imogene King

Served as director of the School of Nursing at Ohio State University in Columbus

Published her first book (1971) ***Toward a Theory for Nursing: General Concepts of Human Behavior***

1968-72

## Ancestry of Imogene King

Received Honorary Doctorate from Southern Illinois University

Appointed professor at University of South Florida, College of Nursing , Tampa FL

1981 –Published her second book, ***A Theory for Nursing: Systems, Concepts, Process***

1980-81

## Ancestry of Imogene King

Published **third** book, ***Curriculum and Instruction in Nursing: Concepts and Process***

1990 – Retired and named professor emeritus at University of South Florida

1986-90

## Intellectual Ancestors & Philosophy

- Systems and Interactional Approach
- General System Theory & Interaction Theory
  - ▣ Ludwig Von Bertalanffy
- Greek Philosophy
  - ▣ Aristotelian-Thomas perspective
    - Individuals strive for the end goal of happiness and flourishing

## Developing a Theory

1968 – In ***A Conceptual Frame of Reference for Nursing***, King began to argue that a theoretical body of knowledge was necessary for the advancement of nursing

Introduced Concepts of **Social Systems, Health, Interpersonal Relationships, and Perceptions**

## Refining a Theory

1971 – In ***Toward a Theory for Nursing***,  
*began to refine the conceptual system*

- What is the goal of nursing?
- What are the functions of nurses?
- How can nurses continue to expand knowledge to provide quality care?

+ Environment and Person

+ Health and Illness

— Adaptation

+ Adjustment

— Man

+ Human Being

*Refining the Conceptual System*

## Conceptual Model

Reflects the metaparadigm of **person, environmental, health, and nursing as systems**

*Open systems interacting with the environment*

## Environment

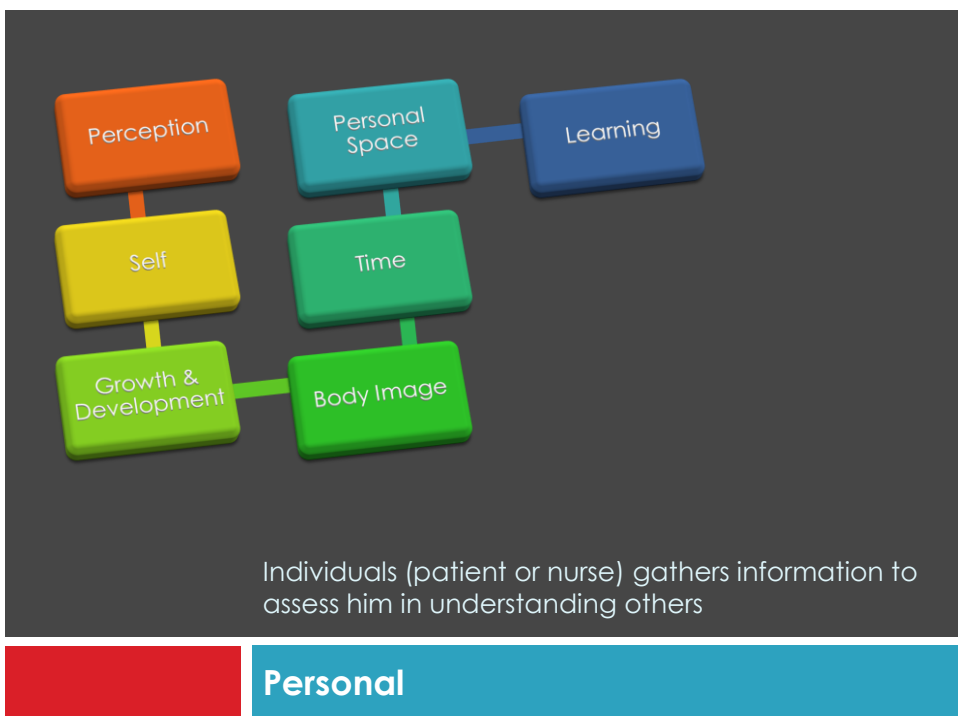

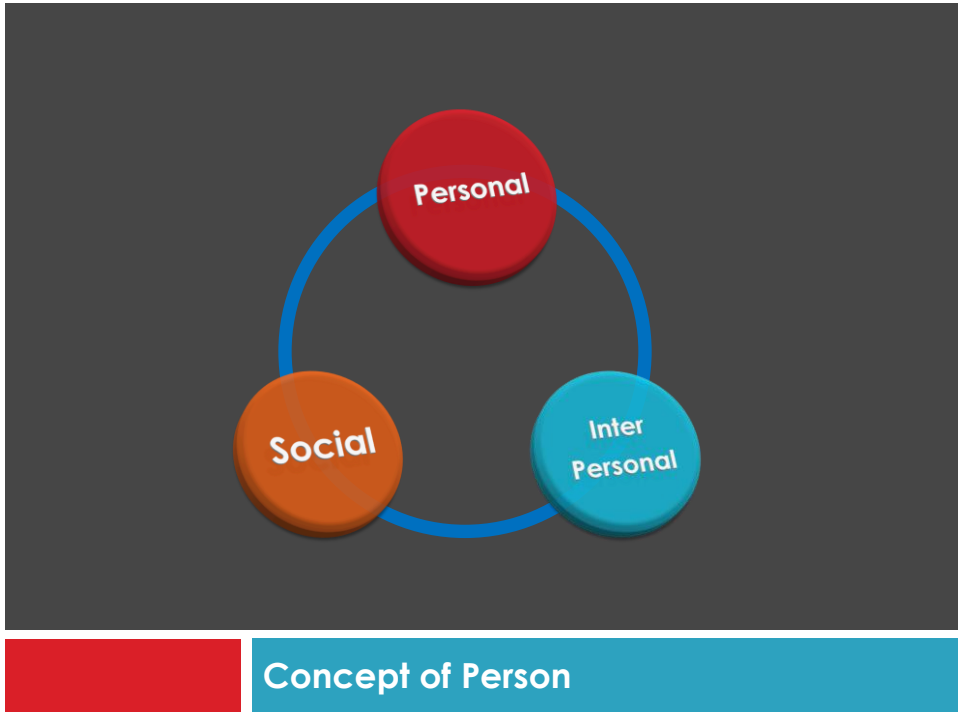

- Holistic & Transformative
- Individuals continually adjust their **internal** environment to transform energy to adjust with the continuous change of the **external** environment

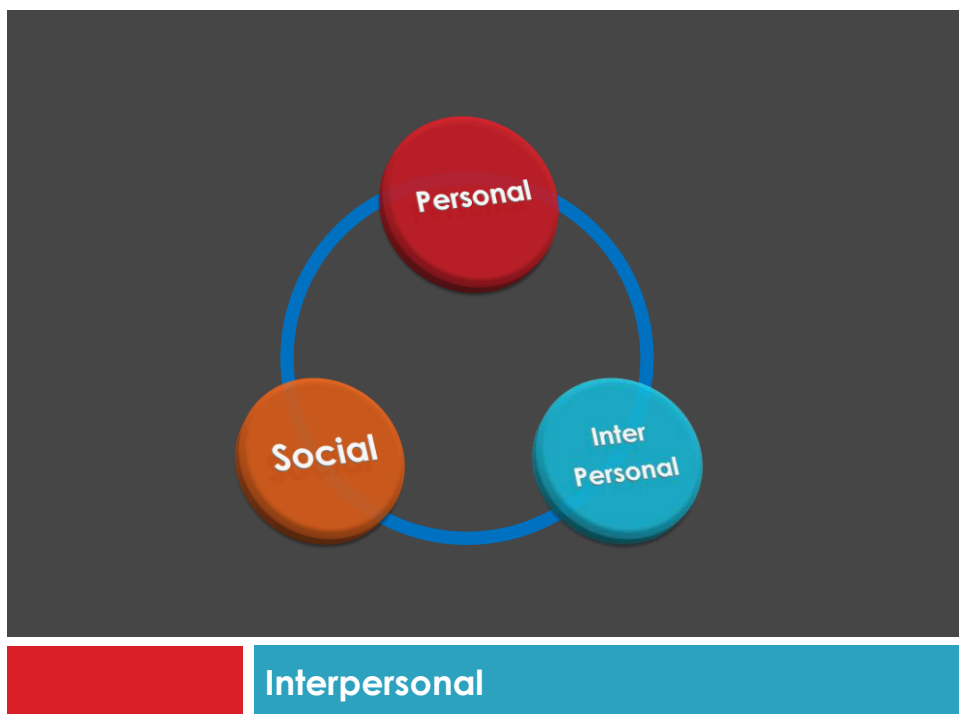

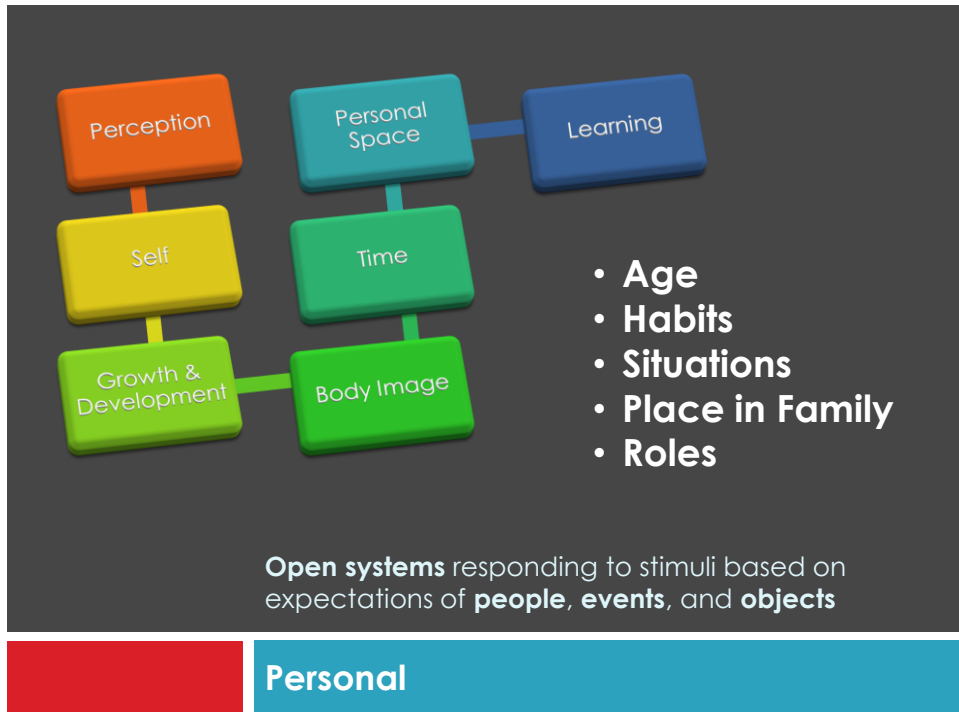

## Health

- A **process** of human growth & development
  - ▣ Constant dynamic change in state of health
  
- Relates to how individuals **deal with the stress** related to growth & development **while functioning** within the cultural patterns which they were born and attempt to conform
  
- *Illness* is an **imbalance** in the person's physiological and psychological makeup **causing a disturbance in state of person**

## Nursing

- Focus is human being & human acts
  
- Action – Reaction – Interaction
  - ▣ Share information about **perception** of the situation
  - ▣ This **interaction** leads to nurse-client **transactions** to establish expectations, mutual goals, and interdependent roles

## Concepts

*Communication*

*Interaction*

*Roles*

*Stress*

*Coping*

*Transactions*

Dyads or triads of people interacting. **Perceptions** shape the person to person **interactions** BUT **communication** is the mode through which individuals make **transactions**

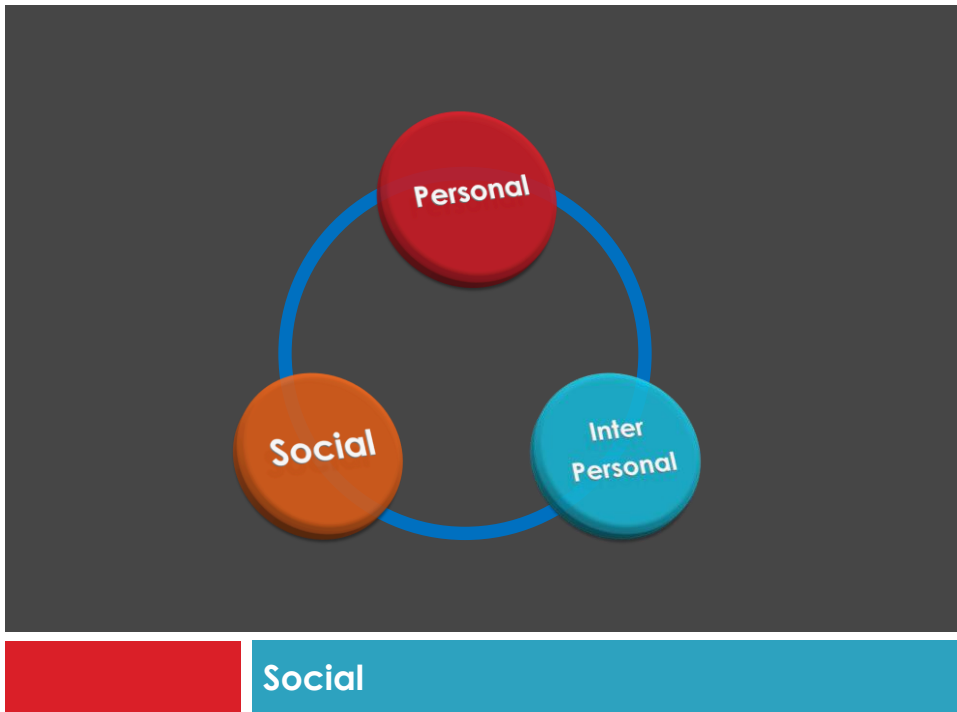

**Interpersonal**

*Setting goals*

*Choosing attainment strategies*

*Maintaining their health*

**Interpersonal Transactions**

## Concepts

*Authority*  
*Decision Making*  
*Organization*  
*Power*  
*Status*

Organized boundary system of social roles, behaviors, & practices developed to maintain values and the mechanisms to regulate practice rules

**Social**

## From Conceptual Framework to Midrange Theory

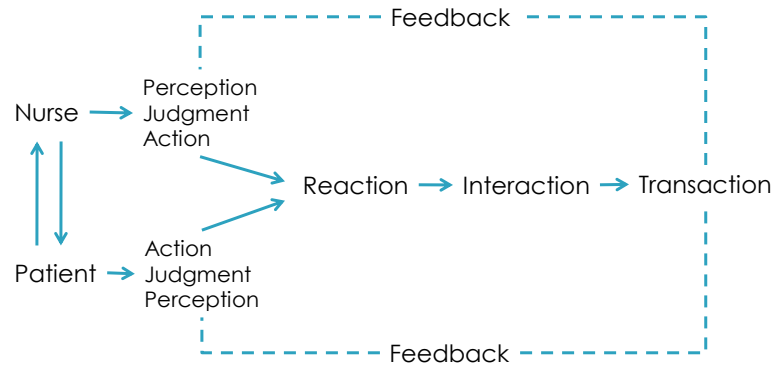

1981 – *What is the nature of nursing?*

### ***A Theory for Nursing: Systems, Concepts, Process***

## Goal Attainment Theory

- Mutual goal setting between a nurse and a client is based on
  - ▣ **(A)** nurses' assessment of a client's concerns, problems, and disturbances in health
  - ▣ **(B)** nurses' and clients' perceptions of time interference; and
  - ▣ **(C)** their sharing of information whereby each functions to help the client attain the goals identified

# A Model of Transaction

*If perceptual congruence is present in nurse-client interactions, transactions will occur*

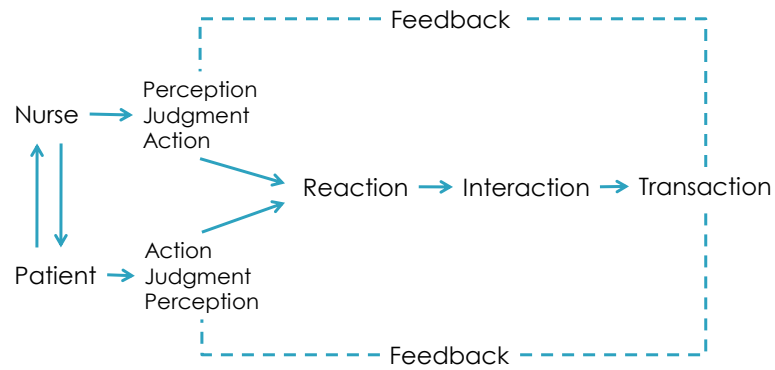

# A Model of Transaction

*If nurse and client make transactions goals will be attained*

# A Model of Transaction

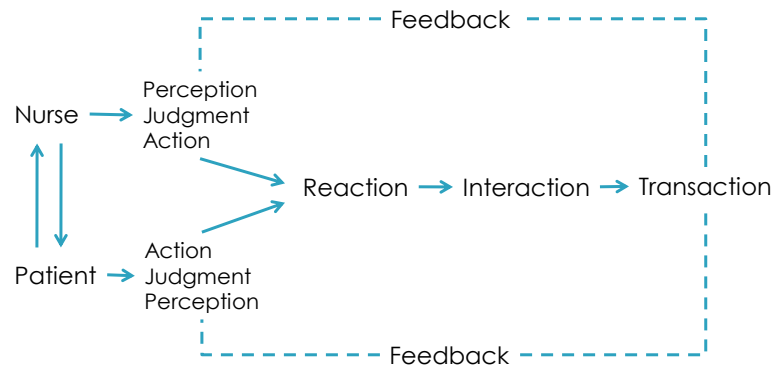

*If goals are attained satisfactions will occur*

# A Model of Transaction

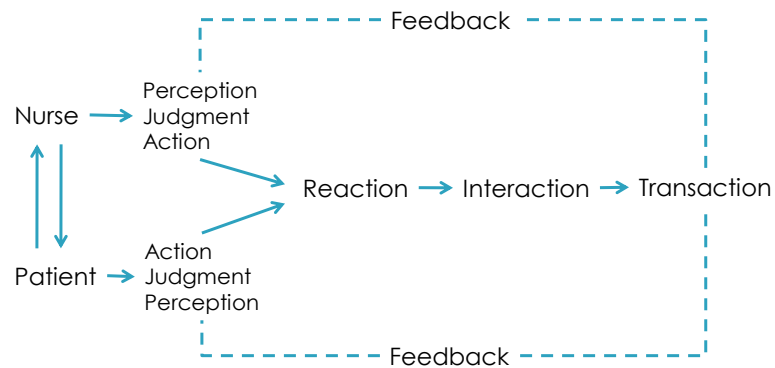

*If transactions are made in nurse-client interactions, growth and development will be enhanced*

# A Model of Transaction

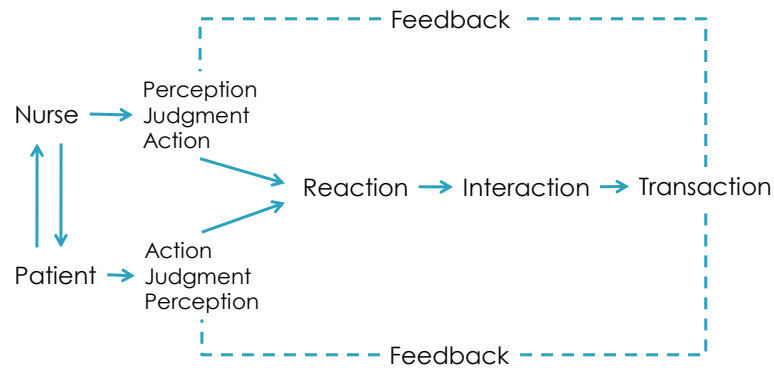

*If role expectations and role performance as perceived by nurse and client are congruent transactions will occur*

# A Model of Transaction

*If role conflict is experienced by nurse and client or both, stress in nurse-client interactions will occur*

# A Model of Transaction

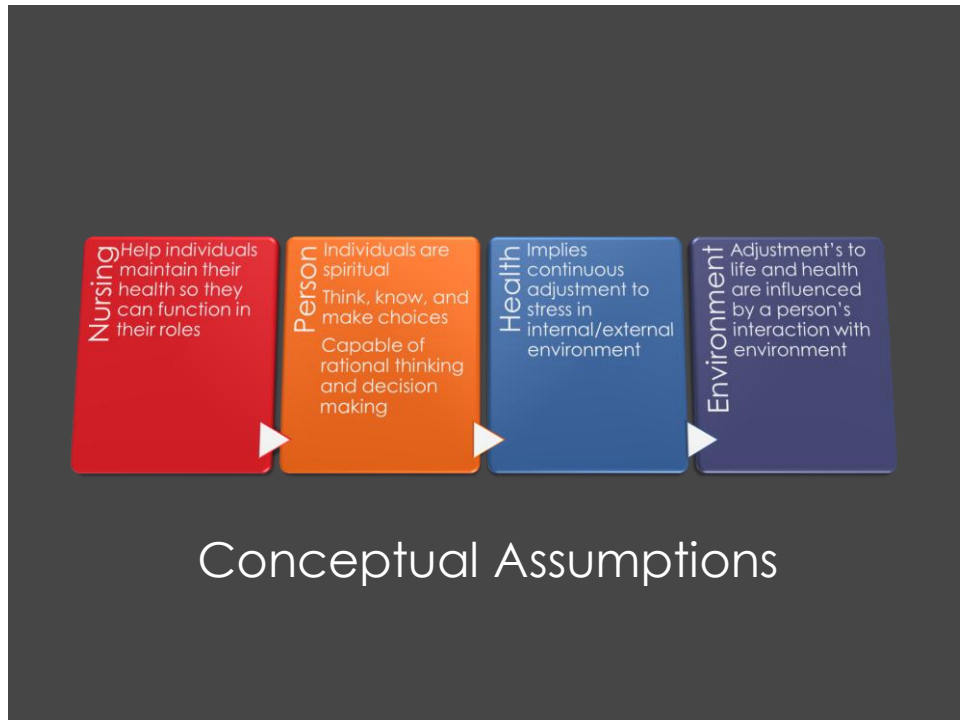

*If nurses with special knowledge and skills communicate appropriate information to clients, mutual goal setting and goal attainment will occur*

## Major Assumptions

*Overall, based on her conceptual framework*

The focus of **nursing** is **human beings** **interacting** with their **environment** leading to a state of **health** for **individuals** which is an ability to function in **social roles**

## Empirical Referents

- **Curriculum Development**
  - OSU / Loyola / University of Florida
- **Documentation System**
  - Goal Oriented Nursing Record
- **Short Term Psychotherapy**
- **Nursing Practice**
  - Nursing Administration
  - Healthcare Organizations
  - Clinical Pathways
  - Nursing Informatics
